

Yichen Wang

Multimedia & Video Communication Portfolio | IAEA Internship

Profile

Journalism and international communication background with experience supporting public-facing video projects, bilingual content coordination, social media dissemination, and post-publication performance reporting. This portfolio is tailored for the IAEA Video and Multimedia internship.

Best-Fit Skills for the Role

Bilingual communication

Metadata and archive logic

CapCut/Jianying editing workflow

Selected Work

Eyes on China series, Xinhua News Agency New Media Center & vivo

Two public-facing video communication cases involving cross-cultural storytelling, platform publication, and audience-performance summaries.

Note: Some original links may require mobile app access or platform verification. Stable evidence is included through screenshots and dissemination report data.

Project Overview

A compact view of the two main multimedia cases. The focus is not only the final video, but also platform adaptation, publication tracking, and communication reporting.

Project	Story angle	Platforms	Results
Eyes on China: Wuhan Through Her Lens	Foreign video blogger presents Wuhan through technology, city life, and human-centered daily scenes.	Xinhua English app; Xinhua app; WeChat Channels	320K+ English app reads; 530K+ Xinhua app reads; 610K+ WeChat views; 60K+ likes; 19K shares
China's Cultural Relics Come Alive	Italian creator and his mother visit Henan Museum; cultural heritage and technology-enabled restoration.	Xinhua app; WeChat Channels; Bilibili; Xinhua English app	590K+ Xinhua app reads; 450K+ WeChat views; 250K+ English app reads; 60K+ Bilibili views; 17K+ WeChat likes

Why This Matters for IAEA

- Experience tracking platform releases, links, screenshots, dates, and performance indicators.
- Comfort with multimedia evidence organization, similar to maintaining Excel/Trello records for video projects.
- Awareness of how titles, thumbnails, descriptions, tags, and platform context affect outreach.
- Experience communicating complex/cultural subjects for public audiences, relevant to IAEA public information work.

Case Study 1

Eyes on China - Wuhan Through Her Lens

Xinhua News Agency & vivo | July 2025

Project focus. A video story told through Celia, a Guatemalan video blogger and foreign-language teacher living in China. The story presents Wuhan through technology, urban life, and everyday observation.

Relevant contribution area. Public-facing video communication, bilingual/cross-cultural storytelling, platform publication evidence, and dissemination reporting.

320K+

IAEA-Relevant Takeaway

This case shows evidence handling after publication: keeping the release link, platform placement, screenshots, format, date, and performance numbers together. This maps directly to organizing finished videos and related details in structured project records.

Case Study 2

China's Cultural Relics Come Alive

Xinhua News Agency & vivo | August 2025

Project focus. A video story featuring Italian creator Alex and his mother at Henan Museum. The video uses foreign visitors' perspectives to present Chinese cultural heritage and technology-enabled restoration.

Relevant contribution area. Multimedia storytelling, cross-platform release tracking, culturally sensitive public communication, and audience performance summary.

590K+

IAEA-Relevant Takeaway

This case is useful for explaining how I can support public information work: collect publication evidence, summarize reach across channels, and help organize multimedia materials so teams can retrieve and reuse assets later.

Role-Specific Skills Mapping

CAT DV / Media asset management

I have not used CAT DV specifically, but I understand naming standards, metadata, tagging, archive organization, and retrieval-oriented records.

Excel / Trello tracking

I can maintain records for ongoing and completed videos: title, topic, owner, status, deadline, platform, link, publishing notes, and metrics.

Premiere / After Effects

My editing practice has mainly been with Jianying/CapCut. I understand timeline editing, subtitling, clip selection, and can learn Adobe workflow quickly.

YouTube / Wistia publishing

I understand platform packaging: title, description, tags, playlists/context, thumbnail evidence, links, and post-publication review.

B-roll and shooting support

I understand B-roll as reusable supporting footage and can help identify useful clips or support basic on-site setup.

YouTube outreach research

I can review audience data and suggest improvements for thumbnails, descriptions, tagging, playlists, and short-form distribution.

Interview Talking Points

Short answer:

My experience is strongest in multimedia communication support: organizing video-related evidence, coordinating bilingual/public-facing content, tracking platform releases, and summarizing performance after publication. I have used Jianying/CapCut rather than Adobe Premiere as my main editing tool, but I understand timeline editing and subtitling logic and can quickly adapt to the team's Adobe workflow. For CAT DV, I have not used the exact system, but I understand metadata, naming standards, tagging, and archive organization.
